1 Testing My Setup

If I can read this in a PDF, my L^AT_EX setup is working.

1.1 A Little Math

Consider the quadratic equation

$$x^2 - 5x + 6 = 0.$$

Factoring gives

$$(x - 2)(x - 3) = 0.$$

Therefore,

$$\boxed{x = 2 \quad \text{or} \quad x = 3}.$$

1.2 A Probability Example

Suppose

$$P(A) = 0.40, \quad P(B) = 0.30,$$

and

$$P(A \cap B) = 0.10.$$

Then

$$P(A \cup B) = P(A) + P(B) - P(A \cap B) = 0.40 + 0.30 - 0.10 = \boxed{0.60}.$$

2 Notes

This document exists solely to verify that my learning-journal L^AT_EX environment works.
